Re: Web Developer

Good day.

I share your pain. It's not easy to read hundreds of resumes

This is not your typical cover letter. **I am not a typical candidate**

I'm amazed at how technology has changed our lives. I love the **Kaizen** term that invites work "in" and "on" the process. I'm passionate about learning. That's why I skipped a year of high school and started university studies. I immerse myself in what I do or learn to understand how things work and improve them. Since my goal is to relocate to Canada and gain further experience, I am open to new opportunities.

Education

Brigham Young University - Idaho April 2021 - December 2023

Associate Degree in Applied Technology (**GPA: 3.85**) Online

- Created and managed dynamic web apps honed for user experience and business operations.
